DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-8 are allowed.**

2. The following is an examiner's statement of reasons for allowance:

As to claims 1, 7 and 8, the prior art fails to teach an information processing device and method comprising: first, second and third generating means, wherein third generating means generates at least one of sibling document frequency data and co parent document frequency data as defined by the specification (i.e. the total sum of weightings (as defined by the equations for calculating corresponding weightings) for links of sibling or co-parent pages) and wherein the method and apparatus further comprises calculating means for calculating page model extension value through processing based on at least one of inverse sibling document frequency and inverse co parent document frequency as defined by the specification.

As to claims 2-6, those claims are allowed by the virtue of their dependency on claim 1.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- **Pant et al (US 6012053)** discloses a computer system with user-controlled relevance ranking of search results wherein the algorithm uses both Tern Document Frequency and Inverse Document Frequency, but does not disclose Sibling document frequency or Co-parent document frequency as defined in the specification of the application.
